Typography report

Fonts, sizes, weights, and line-height used across the site

This report is based on the live typography tokens defined in the codebase and the component classes used in the landing page.

Typography system

Sans-serif: Inter

Serif accent: Instrument Serif

Monospace: JetBrains Mono

Global body font: Inter via CSS variable --font-inter

Accent heading font: Instrument Serif via CSS variable --font-instrument

Labels, counters, and technical notes: JetBrains Mono via CSS variable --font-jetbrains

Style	Font	Size	Weight	Line height	Notes
Body copy	Inter	15px	Regular / Medium	1.625	Main descriptive copy
Secondary copy	Inter	14px	Regular	~1.625	Supporting paragraphs
Navigation	Inter	13px	Regular	default	Header menu links
Buttons	Inter	14px	Medium	default	Primary CTAs
Tag chips	Inter	11px	Medium	default	Small labels
Hero title	Inter	40px / 56px / 48px / 56px	Medium	1.02	Main headline with serif accent
Story intro title	Inter	34px / 44px	Medium	1.15	Section split-heading
Step heading	Inter	28px / 34px	Medium	40px	Story section titles
Serif accent	Instrument Serif	Inherited / display scale	Normal	default	Italic line below sans headline
Monospace meta	JetBrains Mono	11px	Medium	default	Counters and labels
Marquee count	Instrument Serif	30px	Regular	1	Large numeric count

Design behavior

The layout uses a split-heading hierarchy: a modern sans-serif headline paired with a serif italic accent to create a premium, editorial feel.

Most body copy sits in the 14?15px range with relaxed line heights, ensuring readability without seeming too dense or overly airy.

Buttons and navigation rely on medium-weight sans text, keeping interfaces clear and anchored while preserving brand credibility.

Small labels and counters remain compact and intentionally neutral, helping the page feel structured and technical without overpowering the main story.

src/app/page.tsx ? actual heading, paragraph, button, and tag usage

Summary

The type system is intentionally minimal but expressive: Inter carries structure and function; Instrument Serif introduces brand warmth and elegance; JetBrains Mono adds precision to small-meta details.

This creates a balanced interface that feels modern and dependable while avoiding a visually noisy or overly decorative style.

Recommended system snapshot

Body: 15px / 1.625 / Inter / Regular
Small labels: 11px / default / Inter / Medium
Hero headline: 40?56px / 1.02 / Inter / Medium
Accent headline: serif italic / display scale / Instrument Serif
